2005 Implementation Guide available for review – Last chance!

This is your last chance to review the 2005 Implementation Guide before it becomes “official”. A draft is available on-line at http://mhmr.chs.ky.gov/CMHC/cmhc_data_guide.asp. If you have any questions or comments, please contact Dennis Moore (Dennis.Moore@RDMC.org)

Valid Client 2 update

On the Region-specific web page (“Region Reports and Upload”, behind a login and password), there is a report (“Status Client 2s – Details”) that lists all of the clients who are status 2's but who “should” be status 1's. Certain criteria are used to determine which Client 2's are “valid”; these include Client 2's who had fewer than five services and those who received all of their services within 7 days. Client 2's who meet one or more of these criteria are not included in the “Status Client 2s – Details” report. A new group of client 2's has been removed from this report. These newly “valid” Client 2's have received only the following services (DMHMRS Modifier 1 from Event field FA0-12):

- 04 – PASRR – Level II Evaluation
- 05 – Assessment PASRR (deleted FY2002)
- 24 – Miscellaneous Services Purchased
- 25 – Miscellaneous Good Purchased
- 70 – DUI Education Services
- 73 – Consultation
- 74 – Outreach and Education
- 83 – Early Intervention / First Steps (KEIS)

In addition, only those Clients reported in FY 2001 or later will be included in this report of Client 2's who “should” be Client 1's.

New HCPCS and CPT codes

We will now be checking submitted data against the latest version of the full list of HCPCS and CPT codes. Any Regions submitting old codes that are no longer valid will receive a Possible Error; beginning in FY 2005, old codes will generate a General Error.

Brief submission notes

- Please do not place a comma in the “Income” field (Client Field 16). This field is no longer required; however, if you do send it in, make sure it is numeric only.
- Psychiatric Diagnostic Evaluations (DMHMRS Modifier 10 – Event field FA0-12) may be performed by ARNP's.
